Nutanix In The Public Cloud - Overview

Leveraging the public cloud means being able to scale your applications and data on-demand within minutes. Nutanix Cloud Clusters (NC2) and Government Cloud Clusters (GC2) allows you to use a single management plane to manage both your Nutanix private cloud and your public cloud resources in the same Prism interface, allowing for a seamless experience.

This book will go into the technical details of the architecture, networking, storage, and other aspects of running NC2 and GC2.

Nutanix is currently supported on AWS commercial and Gov Cloud, Azure and Google Cloud.
