

# APIs

[ PDF generated October 31 2024. For all recent updates please see the Nutanix Bible releases notes located at [https://nutanixbible.com/release\\_notes.html](https://nutanixbible.com/release_notes.html). Disclaimer: Downloaded PDFs may not always contain the latest information. ]

The HTML5 UI is a key part to Prism to provide a simple, easy to use management interface. However, another core ability are the APIs which are available for automation. All functionality exposed through the Prism UI is also exposed through a full set of REST APIs to allow for the ability to programmatically interface with the Nutanix platform. This allows customers and partners to enable automation, 3rd-party tools, or even create their own UI.

Core to any dynamic or “software-defined” environment, Nutanix provides a vast array of interfaces allowing for simple programmability and interfacing. Here are the main interfaces:

- REST API
- CLI - aCLI & nCLI
- Scripting interfaces
